DETAILED ACTION

Response to Amendment

1. Receipt is acknowledged of the Amendment filed June 28, 2004. Claims 1, 2, 4-11, 13-21, and 23-77 have been amended.

Allowable Subject Matter

2. Claims 1-77 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record, teaches or fairly suggests the claimed optical scan module comprising, among other things, a holder provided with electrodes for electrical wiring to a light emission source and a deflection unit and configured for holding a movable portion of the deflection unit, and a sealing substrate provided together with the holder in a piled relationship, and the light emission source and the movable portion of the deflection unit are enveloped to be tight-closed between the holder and the sealing structure. The optical scan module further comprises a plurality of units that are fixed on a circuit substrate which is constituted as the other member and identical to the optical scan module formed with the light emission source and the deflection unit.

After further search and thorough examination of the present application and in view of the Applicant's arguments and amendments, claims 1-77 are found to be in condition for allowance over the prior art made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
